Developer Licenses

Developer licenses are configured by selecting a SETUP and a UNIT from the options below:

SETUP

- ✓ Single Platform Node Locked License for all supported platforms. Usage for one Diffpack distribution locked to one specific machine.
- ✓ Multi Platform Node Locked License for all supported platforms. Usage for all Diffpack distributions (different platforms) installed on one specific machine.
- ✓ Laptop Bundle License. Twin license for a laptop and a desktop machine. Both must use the same distribution.
- ✓ Single- and Multi Platform Network License for Linux. Floating License available for Linux Diffpack distributions.

UNIT

- ✓ Single User. Counting concurrent users. Combines with all setups.
- ✓ Classroom. Counting bundles of 5 concurrent users. Combines only with Single Platform or Multi Platform Network Licenses. Universities only.
- ✓ Process. Counting number of processes for the Parallel Toolboxes. Combines only with Single Platform or Multi Platform Network Licenses.

Licenses are managed by the inuTech License management system or the FLEXIm license management system

Service

Purchase of developer licenses includes one year of service, i.e. technical support and upgrades. Continued service is purchased on an annual basis.

Run-Time Licenses

Applications developed under a developer license can be installed and run on a third party computer provided that a run-time key is purchased per Diffpack unit used.

Availability

Computer platforms currently supported are:

- ✓ Win32, Visual C++ 9.0/10.0
- ✓ Win64, Visual C++ 9.0/10.0
- ✓ Linux 32bit, gcc 4.0.2
- ✓ Linux 64bit, gcc 4.1.2
- ✓ Mac OS X, gcc 4.1/4.2

Some products/configurations are not available on all platforms.

Pricing

An online form for price quotes is available at <http://www.diffpack.com/forms/pricereq>. You may also contact your local Diffpack distributor.
